MEDIA/PRESS RELEASE

First Nations Cable Now Offering Fiber to the Home Internet Speeds Starting at 100 Mbps

Six Nations of the Grand River, August 12/2026

First Nations Cable is pleased to announce the availability of Fiber to the Home (FTTH) Internet Service, bringing faster and more reliable connectivity directly to homes in the communities we serve.

Customers can now access internet speeds starting at 100 Mbps Download and 100 Mbps Upload, providing symmetrical high-speed connectivity for streaming, video conferencing, online learning, telehealth, gaming, remote work, and everyday use.

The new fiber service represents an important investment in modern telecommunications infrastructure and is designed to help ensure First Nations Communities have access to reliable, high-quality internet service.

“This is an exciting step forward for our customers and our community” said Jeffery Thomas, (Owner of First Nations Cable). Fiber to the Home gives our community the speed and reliability they need today while creating a strong foundation for the future”

With equal upload and download speeds, customers can send larger files, participate in high-quality video calls, upload and download content, and connect multiple devices without sacrificing performance.

First Nations Cable is committed to continuing to expand and improve its network and bringing modern broadband services to the communities it serves.

First Nations Cable and Six Nations of the Grand River would like to sincerely thank the province of Ontario and the government of Canada for their support through the Universal Broadband Fund (UBF). This investment will help expand reliable, high-speed internet access internet access and create greater opportunities for our First Nations Community.

We are grateful for this partnership and look forward to the positive impact this funding will have on the communities we serve.
